

**Declaration
of conformity**

**Innovation,
creativity and
flexibility**

Introduction

Window decorations are more than just products: they are an expression of style and individuality. This has been Coulisse's vision since our establishment in 1992, and it has helped to make our company become a leading supplier of both ready-made window-decoration products and components. We offer our clients a comprehensive range of products, from wooden Venetian blinds to roller blinds and from vertical blinds to pleated blind. Thanks to a constant focus on innovation, creativity and flexibility, we are capable of starting new trends and anticipating specific client needs. Our products are developed at our own engineering department and design studio in The Netherlands and are distributed throughout the world.

**Quality - our key
to asustainable
future**

Apart from designing products and collections that are appealing from an aesthetic point of view, part of our business strategy is creating lasting quality. For us, quality goes beyond the physical lifetime of our products. It also concerns the way they are produced, sold and used. Therefore, we measure the quality of our products not only by their physical quality, but also by the extent to which they are safe for humans and the environment in production and use.

For developing our products we aim at working with partners that share this same vision. We want our products to be produced in a safe and environmentally friendly way and to be safe for humans and their environment in use. Our products are therefore thoroughly tested by renowned international institutes and supplied with official certificates and guarantees. In this brochure you will find an overview of the certificates and guarantees that apply to the products in our product range.

As your supplier we feel it is our responsibility to inform you to our best abilities about the quality of our products. When you know what you are buying, you know what you are selling. This knowledge will allow us all to add even more value to our products and help us in creating lasting quality throughout the distribution channel.

Declaration of conformity

Coulisse feels it is important that products are produced in a safe and environmentally friendly way and that our products are safe to humans and their environment. Therefore they all apply to the official Reach standards and are often tested by renowned international institutes.
